    - 855-547-8255; Code: 14602 from non-DOI lines
- Presentation by Megan Hines from CIDA on "**Refactored iPlover Application**".
    - Abstract: The field season for the iPlover application has just wrapped up. This year's beta version was deployed in April and used by a small group of users to test our approach to data collection with a mobile device in sometimes-connected field locations. Now that the results are in, we can discuss some learned lessons. As we dive into the third iteration of application development in the next few months, I'll talk about what our team selected for technologies and methods in support of disconnected field use and authentication, for example, and review some of the hiccups and issues we encountered along the way.
- Short presentation from a representative from Enterprise Information on the state of the Mobile Framework
- Short presentation on using structured content to support mobile presentation
- Discussion on the CDI Proposal Cycle

July and August – No meeting
